

ChemSol

DRILLING FLUID PRODUCTS

ALUMINUM SULFATE SOLUTION (50%)

PRODUCT DESCRIPTION

Aluminum Sulfate is a colloidal flocculant used to treat water contamination and in wastewater cleanup.

RECOMMENDED TREATMENT

Aluminum Sulfate is generally used in the flocculation of solids in the treatment of water and some waste drilling fluids. Product application rates will vary.

PRODUCT ADVANTAGES

- Cost efficient flocculant.
- Liquid state facilitates rapid treatment through hopper.
- 50% being the most common, various concentrations are available.

TYPICAL CHEMICAL SPECIFICATION AND PROPERTIES

Physical Appearance:	Colorless, clear amber or light green
Odor:	Negligible Odor
Flash Point:	NA
Water Solubility:	Complete

PRODUCT HANDLING

Review all product specification and MSDS information prior to product application. Utilize chemical handling equipment and personal protection apparel (i.e. goggles & gloves) as specified in product MSDS when handling this material. Avoid inhalation and direct contact with eyes.

STORAGE

Store Aluminum Sulfate away from sources of ignition and excess heat.

PACKAGING

Aluminum Sulfate is available in drums, totes, and 5gal pails upon request.
