DRILLING FLUID PRODUCTS

COTTONSEED HULLS

PRODUCT DESCRIPTION

Cottonseed Hulls are fibrous, biodegradable material that is an excellent bridging agent when large-particle size material is needed. They can be used in any water based system.

RECOMMENDED TREATMENT

Cottonseed Hulls are generally applied as a slug treatment in concentrations up to 20lb/bbl or as an additive for the entire system. Cottonseed Hulls can be mixed directly through the mud hopper or added to the pits. It is recommended that a combination of products be combined with Cottonseed Hulls to ensure a varying particle size.

PRODUCT ADVANTAGES

- Can be rapidly and effectively mixed through the hopper.
- An economical and widely available LCM material.
- Environmentally safe drilling additive.

TYPICAL CHEMICAL SPECIFICATION AND PROPERTIES

Physical Appearance:	Light colored-Fibrous Material
Solubility in Water:	Soluble

PRODUCT HANDLING

Review all product specification and MSDS information prior to product application. Utilize chemical handling equipment and personal protection apparel (i.e. goggles & gloves) as specified in product MSDS when handling this material. Avoid inhalation and direct contact with eyes.

STORAGE

Store Cottonseed Hulls in a well ventilated area away from sources of ignition. Avoid contact with moisture.

PACKAGING

Cottonseed Hulls are available in 50lb bags.
